Claims 1, 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 "chondroitin" is misspelled. Further, it is unclear as to whether the molecular weight limitation following "hyaluronic acid" applies only to the latter or to chondroitin as well.

In view of the uncertainty over whether only chondroitin sulfate over 1.5 M is excluded, the rejection in the action filed 1/3/07 is repeated:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Soll et al.

Soll et al teach minimizing damage to endothelial and epithelial cells by treatment with chondroitin sulfate prior to surgery (abstract). A molecular weight of 50,000-100,000 is disclosed (column 3 lines 8-10). A concentration of 0.5-30% is disclosed (column 5 lines 64-66). A protective coating is specified (column 5 lines 31-32).

35 U.S.C. 101 reads as follows:

Art Unit: 1616

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1, 3-7 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. Applicants claim "preventing", however, such a limitation is not credible because it suggests protection can be achieved for an unlimited period of time under any and all conditions.

Claims 1, 3-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Because the claimed "preventing" is not credible, applicants are not enabled for this limitation.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to

Art Unit: 1616

be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 3-7 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-5; 1-5; 1-4; 1-5; 1-4; and 1-7, 12, 14 of U.S. Patent No. 5,140,016; 5,340,016; 5,632,979; 6,010,692; 6,464,970; and 6,706,780. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims claim polymers and molecular weights that overlap in scope with the patented claims.

No claims allowed.
